# What Is PTE Exam?

The Pearson Test of English (PTE) is a computer-based English language proficiency exam. Students can use the PTE test to get admission to colleges and universities all around the world. It is one of the easiest exams compared to others, like IELTS or TOEFL.

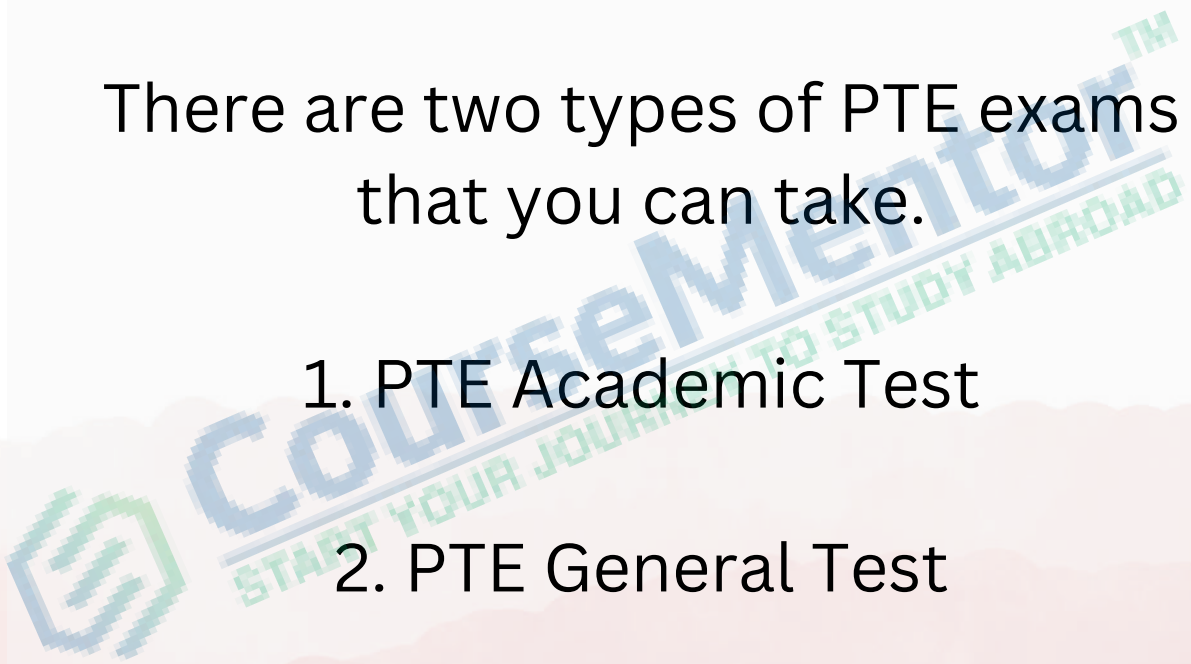

There are two types of PTE exams that you can take.

This exam measures the English language proficiency of students in speaking, reading, writing, and listening. Where 90 is the maximum score that a student can receive.

# Types Of PTE Exam?

There are two types of PTE exams that you can take.

1. PTE Academic Test
2. PTE General Test

# Types Of Section In PTE Exam

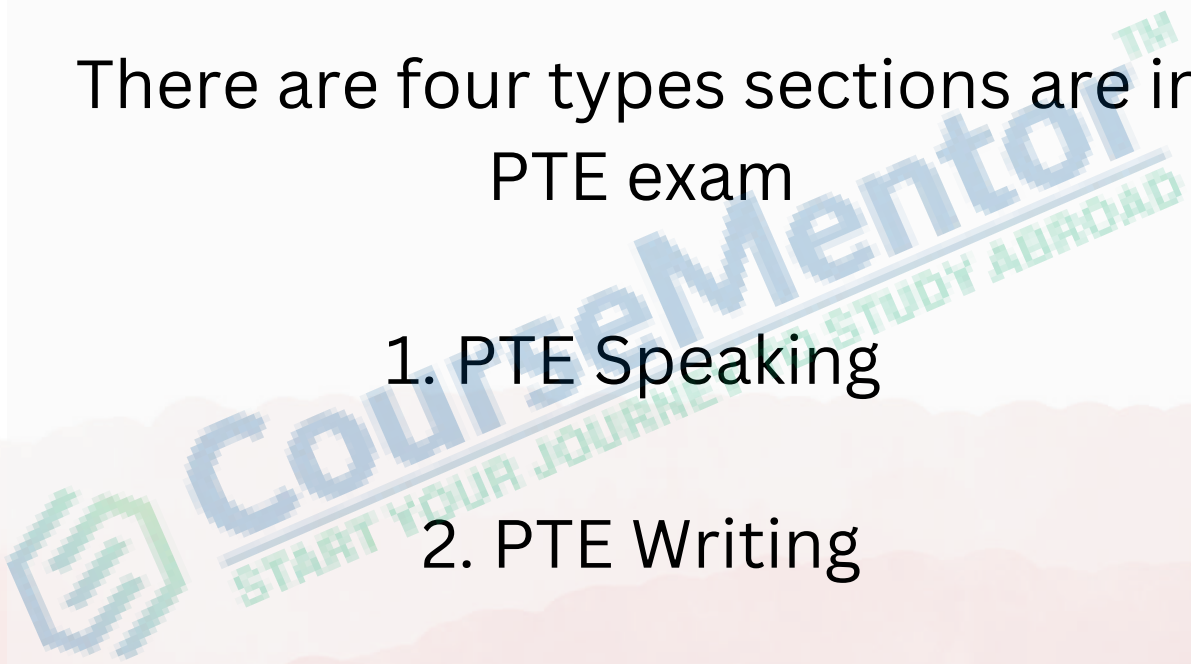

There are four types sections are in PTE exam

1. PTE Speaking

2. PTE Writing

3. PTE Reading

4. PTE Listening

# PTE Exam Pattern Basic Overview

Section	Time	Question Types
Writing and Speaking	54 – 67 minutes	<ul style="list-style-type: none"><li>• Read Aloud</li><li>• Repeat sentence</li><li>• Describe image</li><li>• Re-tell lecture</li><li>• Answer short question</li><li>• Summarize written text</li><li>• Essay</li></ul>
Reading	29 – 30 minutes	<ul style="list-style-type: none"><li>• Reading &amp; writing: Fill in the blanks</li><li>• Multiple-choice, choose multiple answers</li><li>• Re-order paragraphs</li><li>• Reading: Fill in the blanks</li><li>• Multiple-choice, choose single answer</li></ul>

Section	Time	Question Types
Listening	30 – 43 minutes	<ul style="list-style-type: none"><li>• Summarize spoken text</li><li>• Multiple-choice, choose multiple answers</li><li>• Fill in the blanks</li><li>• Highlight correct summary</li><li>• Multiple-choice, choose a single answer</li><li>• Select missing word</li><li>• Highlight incorrect words</li><li>• Write from dictation</li></ul>

# PTE Pdf Section Wise

Here we provide a section-wise pdf of their question types.

# 1. Speaking Section

Question type	Question per task	Information
Read aloud	6-7	You will be given a textual passage with 40 seconds to prepare for this. And then, you will have another 40 seconds to read the passage aloud.
Repeat Sentence	10-12	The candidate will hear a recording of a single sentence; the candidate can hear it only once, and after that, their response will start recording.
Describe the image	3-4	The candidate will see an image in this test; it can be anything like a map, chart, table, etc. The candidate will have 25 seconds to prepare, and then he has to describe that image within 40 seconds.

<b>Question type</b>	<b>Question per task</b>	<b>Information</b>
Re-tell lecture	1-2	Candidates will hear a lecture of around 1 minute in this test and have 10 seconds to prepare. After that, they must tell the lecture's main points in 40 seconds.
Answer short questions	5-6	In this, candidates will be asked a question and then answered in a simple phrase or a word.

## 2. Writing Section

Question type	Question per task	Information
Summarize Written Text	1-2	In this, candidates will see a textual passage and have 10 minutes to summarize it in one sentence.
Write Essay	1-2	Candidates must write an essay on a given topic within 20 minutes.

# 3. Reading Section

Question type	Question per task	Information
Multiple choice (choose a single answer)	1-2	In this, candidates will have a passage of around 100 words, with a question and some choices. Candidates have to select the answer from the choices according to the passage.
Multiple choices (choose multiple answers)	1-2	Candidates will see a textual passage of around 200 to 300 words. Candidates will also see a question with 5 to 7 choices and must select the right choice.
Re-order paragraphs	2-3	In this test, candidates will have a passage with some shuffled paragraphs. Candidates have to correct them.

<b>Question type</b>	<b>Question per task</b>	<b>Information</b>
Reading: fill in the blanks.	4-5	Candidates will see 4 or 5 passages of around 80 words, with 3 to 5 blanks and 6 to 8 choices.
Reading & writing: fill in the blanks	5-6	In this, candidates will see a passage of around 300 words; there will be some blanks. When you take your mouse cursor to a blank, you will see four options and must select the most suitable option.

## 4. Listening Section

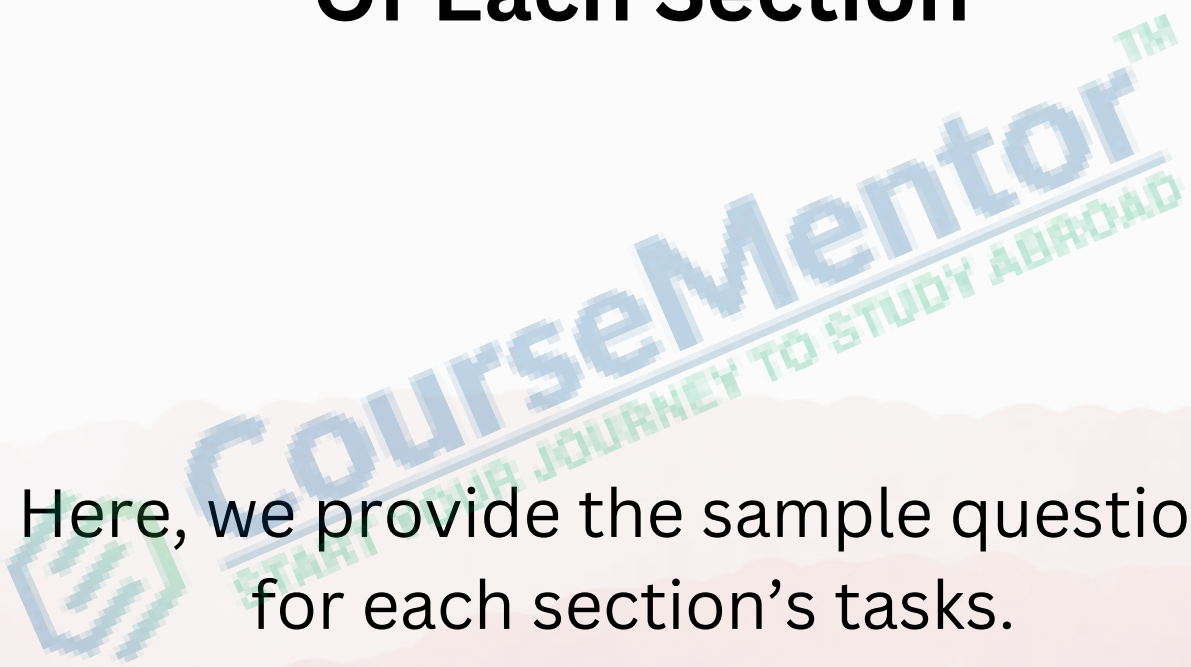

Question type	Question per task	Information
Summarize spoken test	1-2	In this test, candidates will hear a lecture, and then they have to write a summary of 50 to 70 words for the lecture. The candidate will have around 10 minutes for each question.
Fill in the blanks	2-3	Candidates will hear an audio clip, and then they will see a passage with blanks and have to fill in the correct words in the blank.
Multiple choice: choose various	1-2	Candidates will hear a lecture of around 40 seconds to 90 seconds. And then, they have to choose 2 or 3 correct options from 5 to 7.
Write from the dictation	3-4	Candidates will hear a sentence, and then they have to write it down exactly as they hear it.

Question type	Question per task	Information
Highlight the correct summary	1-2	Candidates will hear a lecture of around 30 to 90 seconds and then have to choose the correct answer from 3 to 5 options.
Multiple choice: choose a single answer	1-2	Candidates will hear a lecture of around 60 seconds to 90 seconds. And then have to choose the correct option from the given choices.
Highlight incorrect words	2-3	Candidates will hear an audio clip of 15 seconds to 50 seconds, then they will see a textual passage and have to highlight wrongly pronounced words.
Select the missing word	1-2	Candidates will hear a lecture of 20 seconds to 70 seconds with some blanks, and then they have to choose suitable words for those blanks from 3 to 5 options.

# PTE Pdf Sample Questions Of Each Section

Here, we provide the sample questions  
for each section's tasks.

# Speaking Section

## Q1. Read Aloud

You will be given a textual passage with 40 seconds to prepare for this. And then, you will have another 40 seconds to read the passage aloud.

## Question a

There is a growing trend toward vegetarianism and veganism in the Western world. Many factors, including concerns about animal welfare, environmental sustainability, and personal health, drive this. Vegetarians and vegans avoid consuming meat, poultry, fish, and other animal products such as dairy and eggs. Instead, they rely on plant-based foods like fruits, vegetables, grains, and legumes for their nutritional needs. While some critics argue that a vegetarian or vegan diet lacks certain nutrients, research suggests that careful planning can provide all the necessary nutrients for a healthy diet.

## Question b

Artificial intelligence (AI) is a rapidly developing technology that has the potential to revolutionize many industries, from healthcare to finance to manufacturing. AI involves using algorithms and machine learning to perform tasks that traditionally require human intelligence, such as recognizing patterns, making predictions, and responding to natural language. While AI can potentially increase efficiency and productivity, it also raises ethical concerns, such as the possibility of biased algorithms and the impact on employment. As such, policymakers and the public need to consider AI's implications carefully and ensure that it is developed and used responsibly and ethically.

### **Question c**

Climate change is one of the most pressing challenges facing the world today. It is caused by human activity, primarily burning fossil fuels like coal, oil, and gas, which releases greenhouse gases into the atmosphere and traps heat. It leads to various impacts, including rising sea levels, more frequent and severe weather events, and changes to ecosystems and wildlife.

Reducing greenhouse gas emissions through measures such as transitioning to renewable energy sources, improving energy efficiency, and promoting sustainable land use practices is essential to mitigate these impacts.

### **Question d**

The internet has transformed how we communicate, connect, and access information. It has created new opportunities for businesses, individuals, and communities and has enabled the sharing of ideas and knowledge on a global scale. However, it has also raised concerns about privacy, security, and spreading misinformation. As such, it is important for users to be aware of these risks and to protect themselves online, such as using strong passwords, avoiding suspicious websites, and being critical of information found online.

## Question e

Globalization refers to the world's increasing interconnectedness through trade, communication, and travel. It has led to the spread of ideas, cultures, and technologies and has facilitated economic growth and development in many parts of the world. However, it has also led to concerns about the impact on local cultures and economies and the exploitation of workers and the environment. To ensure that globalization benefits everyone, it is important to promote policies and practices that prioritize social and environmental responsibility and to support local communities and workers in the face of global competition.

## Q2. Repeat Sentence

The candidate will hear a recording of a single sentence; the candidate can hear it only once, and after that, their response will start recording.

**Question a**

**Question b**

**Question c**

**Question d**

**Question e**

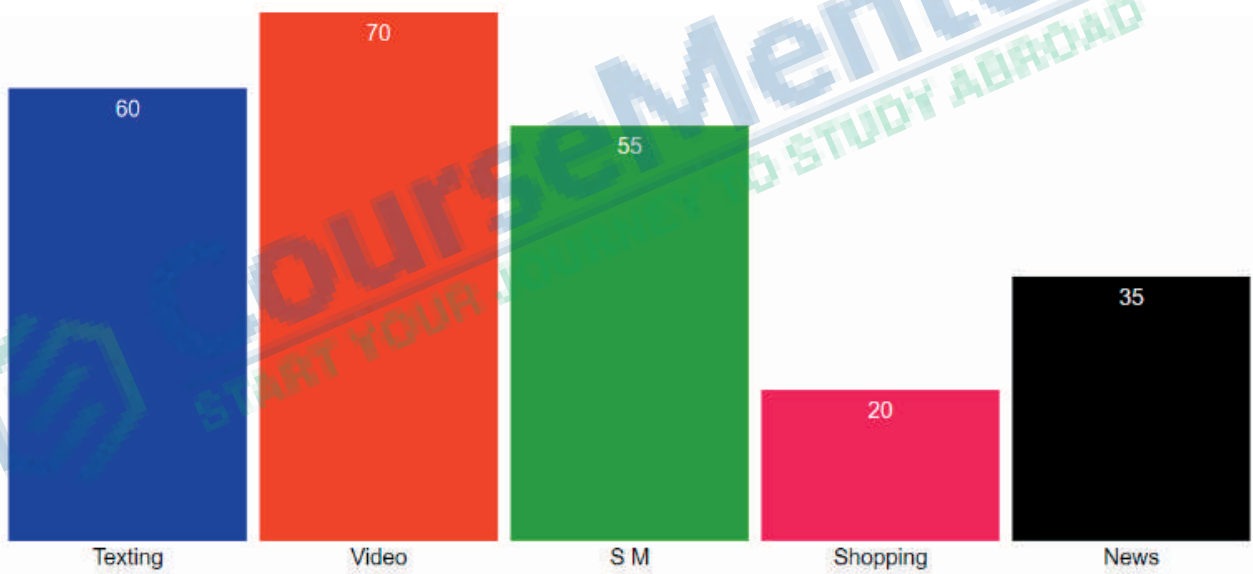

### **Q3. Describe Image**

The candidate will see an image in this test; it can be anything like a map, chart, table, etc. The candidate will have 25 seconds to prepare, and then he has to describe that image within 40 seconds.

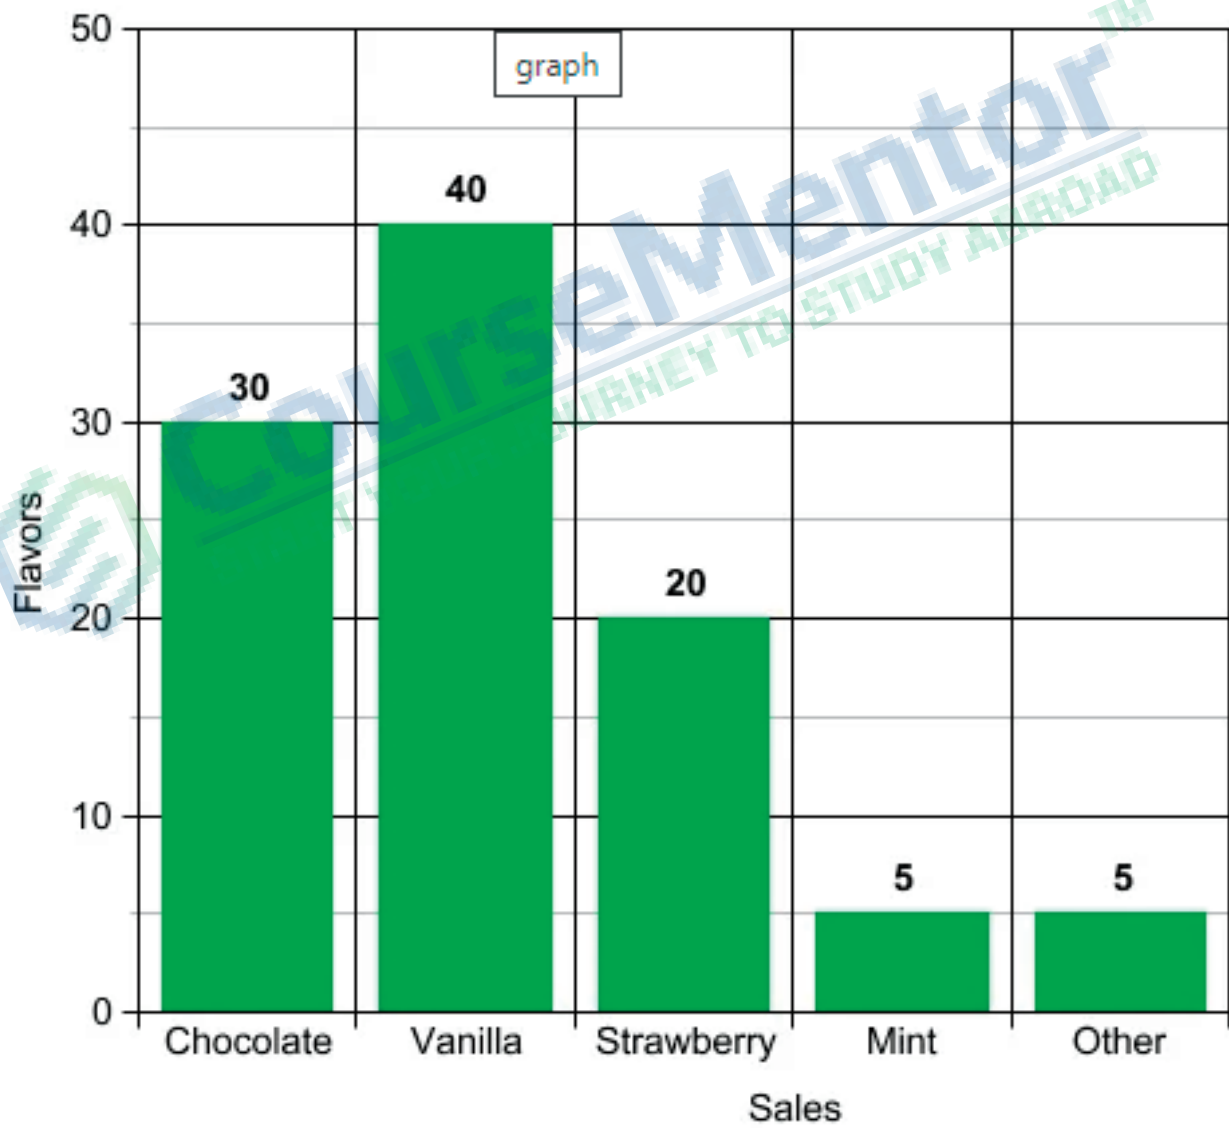

## Question a

Mobile phone usage in 2017 ( figures in %)

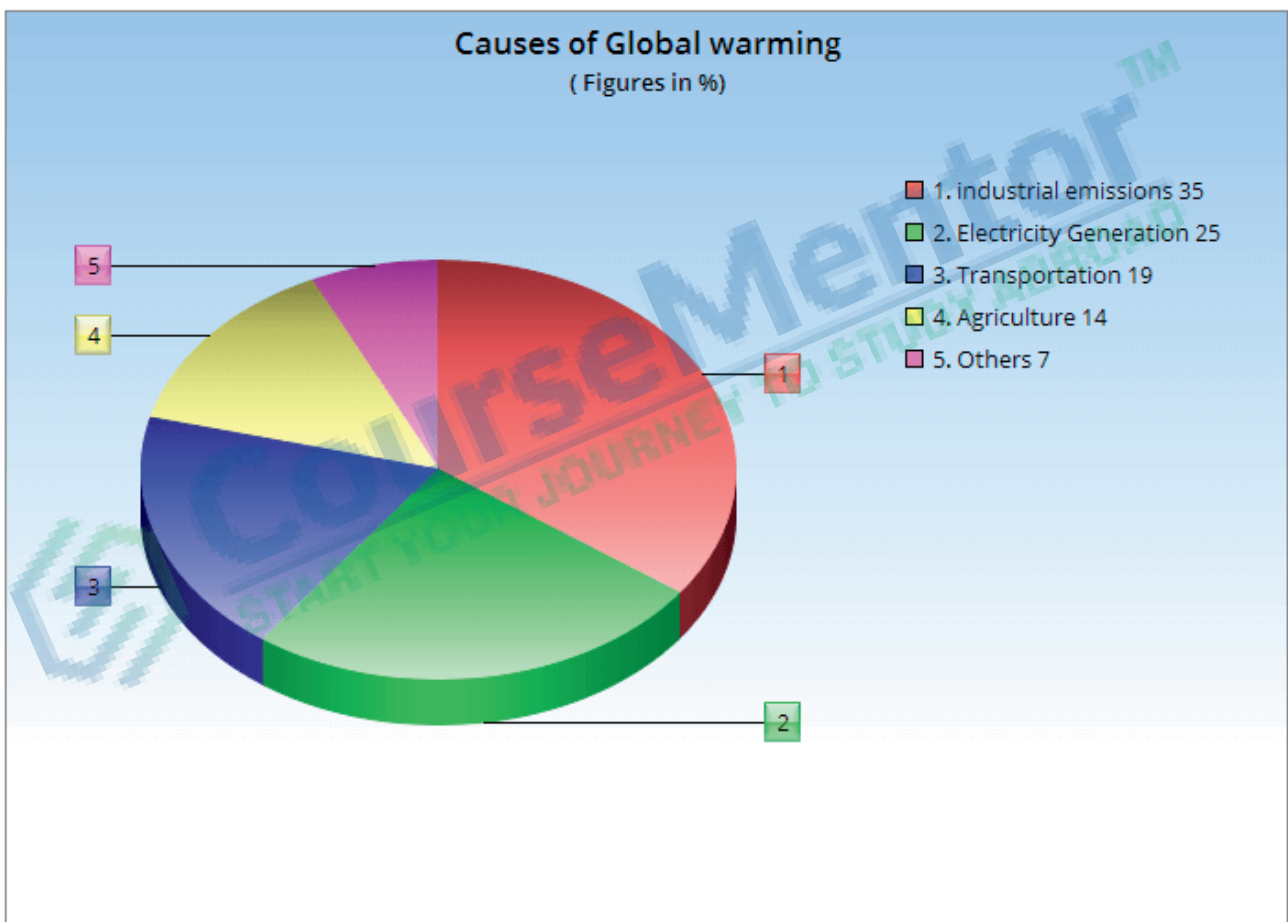

## Question b

Sales of Ice Cream Flavors ( Figures in %)

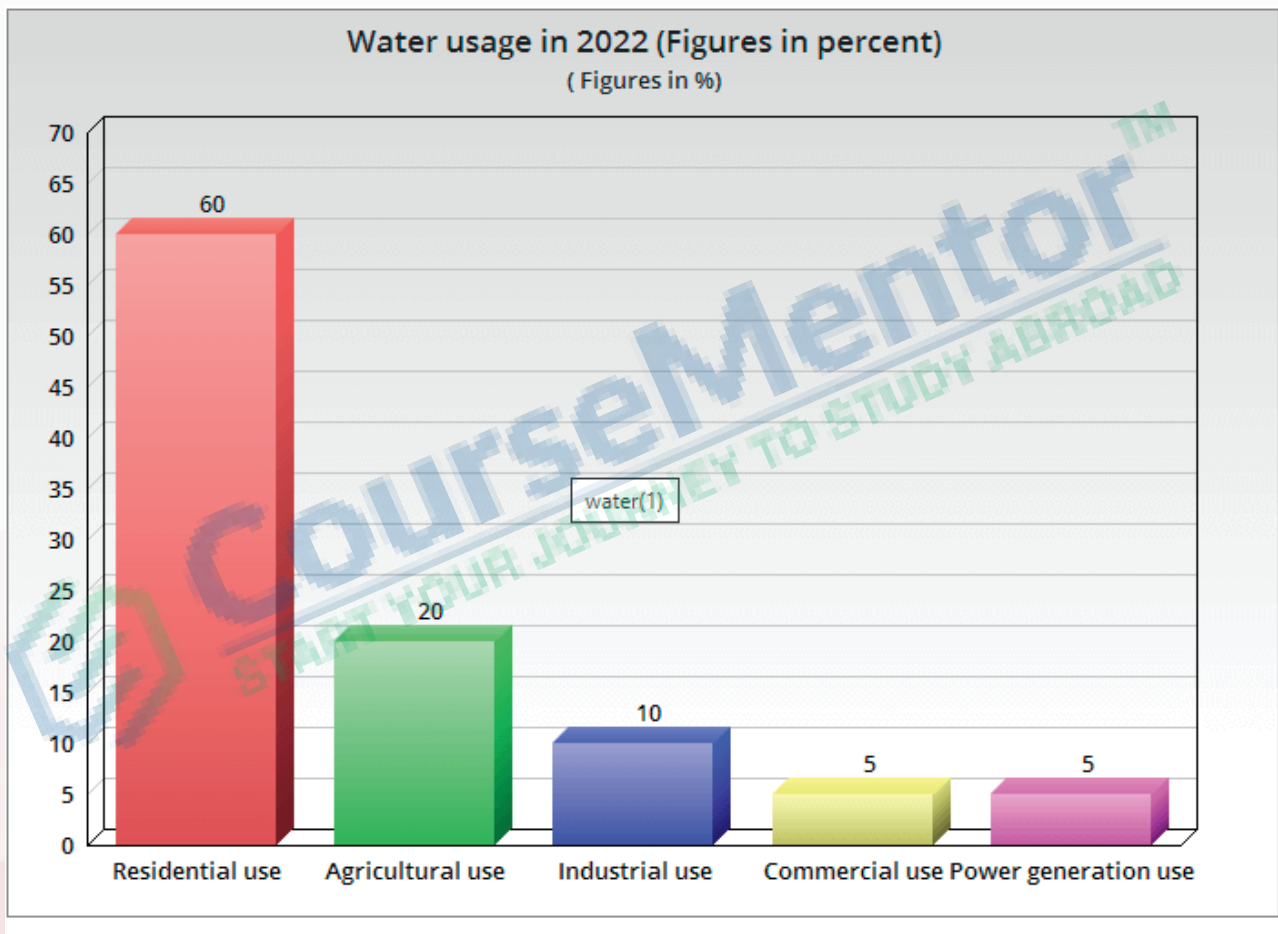

## Question c

## Question d

## Question e

## Q4. Re-tell lecture

Candidates will hear a lecture and have 10 seconds to prepare. After that, they must tell the lecture's main points in 40 seconds.

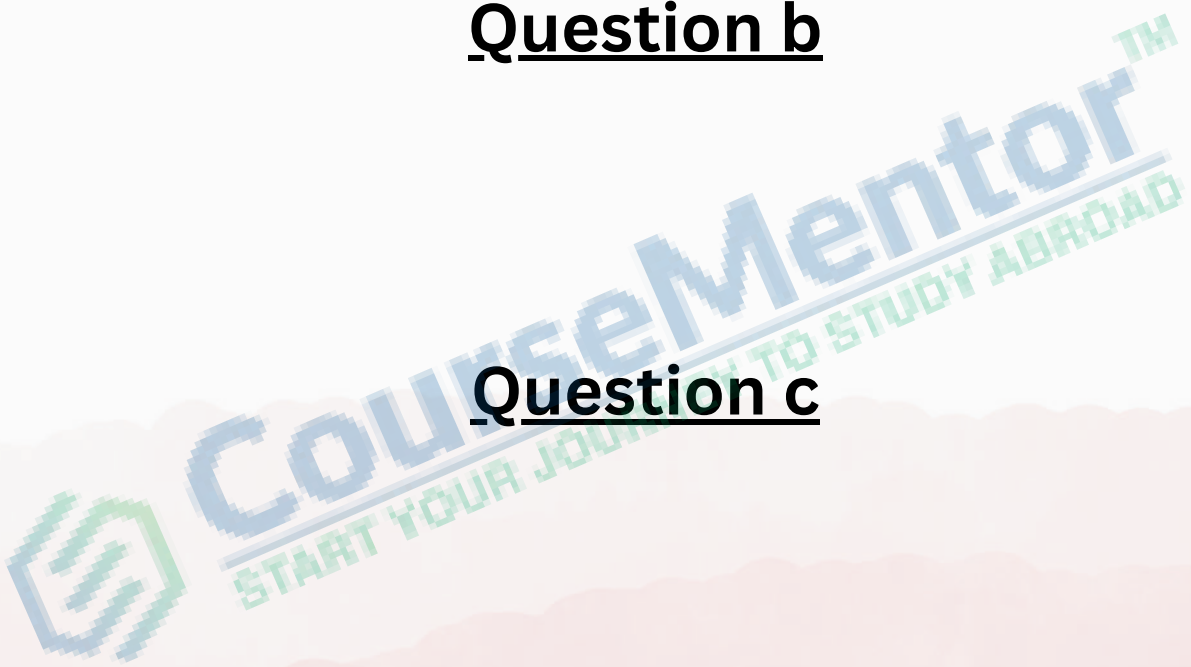

**Question a**

**Question b**

**Question c**

**Question d**

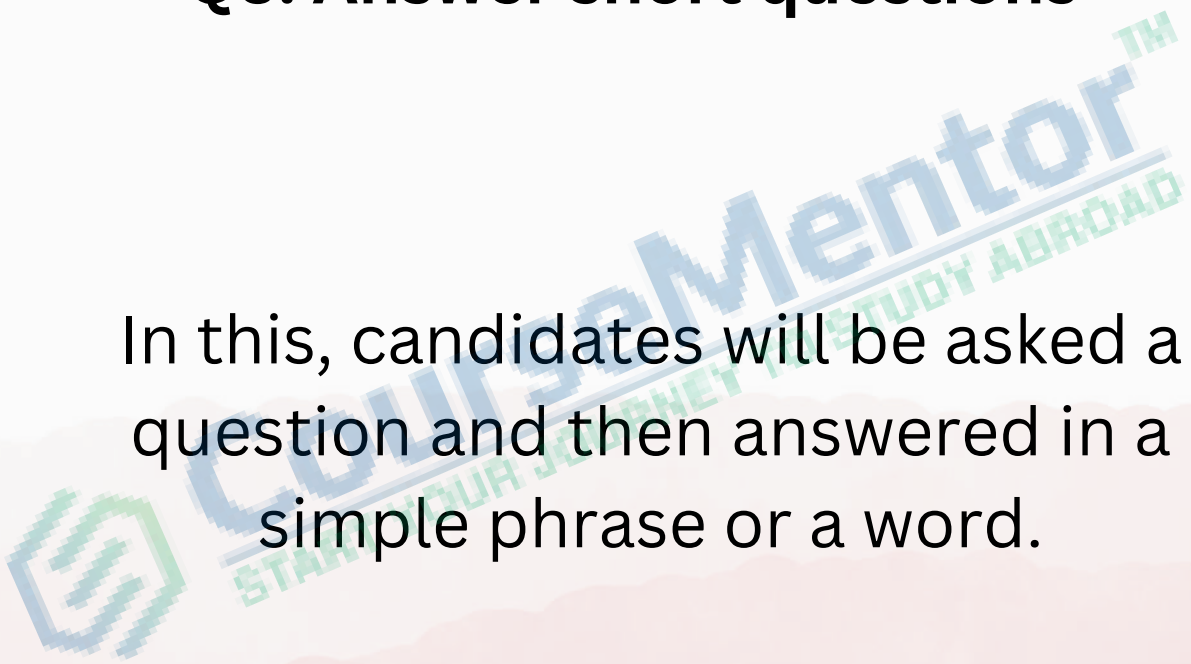

**Question e**

## **Q5. Answer short questions**

In this, candidates will be asked a question and then answered in a simple phrase or a word.

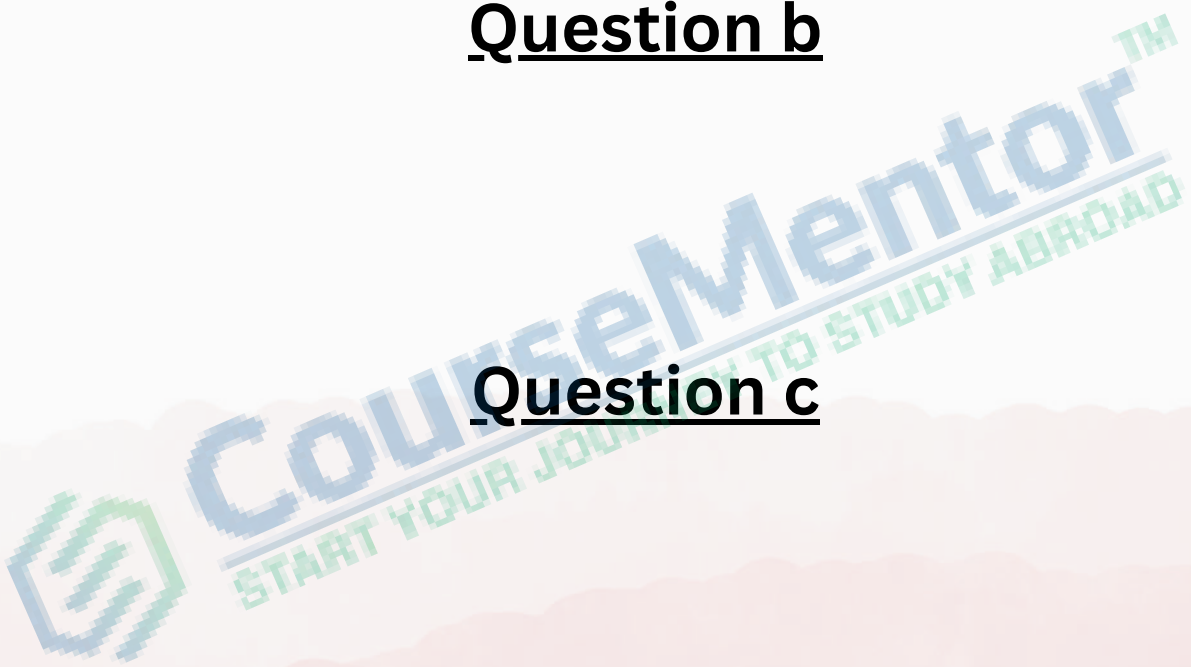

**Question a**

**Question b**

**Question c**

**Question d**

**Question e**

# Writing Section

## Q1. PTE Summarizes Written Text

In this question type, candidates will see a textual passage and have 10 minutes to summarize it in one sentence.

### **Question a**

Electric vehicles (EVs) demand has increased significantly in recent years. This can be attributed to many factors, including growing environmental concerns and improvements in battery technology. EVs offer advantages over traditional gasoline-powered vehicles, including lower operating costs and reduced emissions. However, widespread adoption still has challenges, such as limited charging infrastructure and higher upfront costs.

### **Question b**

The concept of social responsibility in business has gained increasing attention in recent years. Socially responsible companies aim to positively impact society and the environment rather than solely focusing on maximizing profits. This can be achieved by reducing waste and emissions, promoting diversity and inclusion, and supporting community development initiatives.

### **Question c**

The use of renewable energy sources such as solar and wind power has grown significantly in recent years. This is partly due to technological improvements and government incentives for clean energy. Renewable energy has many benefits, including reduced greenhouse gas emissions and increased energy security. However, there are still challenges to overcome, such as intermittency and the need for energy storage solutions.

### **Question d**

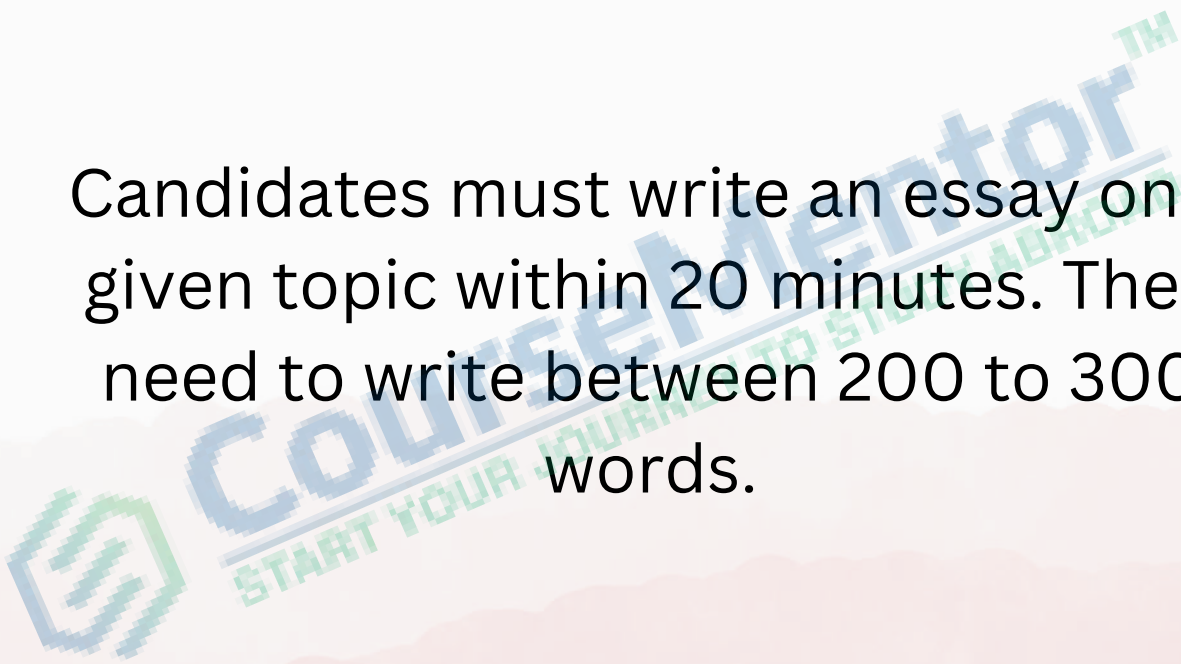

Artificial intelligence (AI) can potentially revolutionize numerous industries, from healthcare to finance. AI systems can analyze vast amounts of data and identify patterns humans might miss, leading to more accurate predictions and better decision-making. However, there are concerns about the ethical implications of AI, particularly in areas like employment and privacy.

### **Question e**

The rise of e-commerce has fundamentally changed the retail industry. Online shopping has become increasingly popular due to its convenience and ability to offer a wide range of products at competitive prices. However, this shift has also significantly impacted brick-and-mortar stores, with many struggling to compete with their online counterparts.

## Q2. Write Essays

Candidates must write an essay on a given topic within 20 minutes. They need to write between 200 to 300 words.

### **Question a**

Some people believe that students should only study academic subjects, while others think they should also learn practical skills. Discuss both views and give your opinion.

### **Question b**

Some people think that social media positively influences society, while others believe it has a negative impact. Discuss both views and give your opinion.

### **Question c**

Some people believe children should start learning a foreign language from a young age, while others think it should not be introduced until later in life. Discuss both views and give your opinion.

### **Question d**

Some people believe that the use of technology has made us more isolated, while others think that it has brought people closer together. Discuss both views and give your opinion.

### **Question e**

In many countries, young people are becoming more involved in politics. Discuss the reasons for this and its potential consequences.

# Reading Section

## Q1. Multiple choice (Choose A Single Answer)

In this, candidates will have a passage of around 100 words, with a question and some choices. Candidates have to select the answer from the choices according to the passage.

## Question a

Washing hands can keep you healthy and prevent the spread of respiratory and diarrheal infections from one person to another. Germs can spread from other people or surfaces when you touch your eyes, nose, and mouth or prepare or eat food and drinks with unwashed hands. The germs can also spread when you blow your nose, cough, or sneeze into your hands and then touch other people's or common objects. Washing hands with soap and water is the best way to eliminate germs. If soap and water are not readily available, you can use an alcohol-based hand sanitizer that contains at least 60% alcohol.

The author considers handwashing to be important because

- It helps avert infectious diseases
- People do not prefer to shake hands with others
- There is a shortage of necessities
- It boosts the sales of alcohol-based hand sanitizers

## Question b

The harp was the favorite instrument of ancient Saxons in Great Britain. No nation has been more famous for its harps and folk musicians than the Welsh and Irish. The legendary Alfred infiltrated the Danish camp, disguised as a folk musician, because the harpers had marched through the enemy's ranks undisturbed because of their profession. The same trick was also employed by several Danish chiefs in the camp of Athelstan, the Saxon. The bards, or harpers of old, were the historians of the time; they handed down from generation to generation the history of remarkable events and the deeds and lineage of their celebrated chiefs and princes. The harpers of Britain were invited to the banquets of kings and nobles: their task was to sing or recite the victories of their patrons.

What does the writer say about the harp?

- They were often played at festivals.
- Ancient Saxons did not like the musical instrument
- They were used in religious services by the priests.
- Folk musicians used them to praise the nobility.

## Question c

Potatoes grew wild in Peru, a country in South America, from where they were transplanted to other parts of the American continent and then to Europe. The honor of introducing this valuable vegetable into England is divided between Sir Francis Drake in 1580 and Sir Walter Raleigh in 1586, some ascribing it to the former and others to the latter. They were certainly obtained from Virginia at the time of Raleigh; they were planted only in the gardens of the rich people and were considered a great delicacy. They are now the staple food in most countries of Europe and America; in Ireland, they have long provided nearly 80% of the entire food of the people.

What is the writer's conclusion about potatoes?

- The potato is a root vegetable native to Ireland.
- Potatoes are the primary source of food in many parts of the world.
- Most families can't afford to buy potatoes.
- People who increased their consumption of potatoes gained more weight over time.

## Question d

Physical exercises are vital to general health. The working man, however, is likely to get enough of it from his daily work. Still, those with sedentary habits, especially those working indoors, will not get enough exercise from their activities.

While the gym is popular and has done a lot to make weak people strong, no one should take more than very simple exercises without a doctor's advice. Exercises can be done in the bedroom with the use of light dumbbells or without the use of any apparatus at all.

Walking is best because it can be enjoyed by those in poor health or physically weak. It takes one out of the door and exercising is much better than exercising in a closed room. If you exercise at home, open all the windows.

What is the writer's conclusion about exercise?

- Exercising at home is much better than exercising out of doors
- Vigorous exercise may be performed safely after midlife with the guidance of a doctor
- Regular walking is only helpful if you are physically weak
- People with desk-bound jobs get sufficient physical exercise.

## Question e

Declines in renewable energy pricing are creating opportunities for electric cooperatives in the U.S. to deliver cost savings to their members. However, according to a new study, this also creates risks for those utilities that are slower to transition to these technologies. Electric cooperatives have proposed retiring significant coal capacity and generating 55 percent of their energy from wind and solar resources by 2026. This would likely result in net customer cost savings because of the highly competitive bids for wind and solar energy. The long-term fixed prices for new wind and solar projects beat the operating costs of many existing coal assets in the West.

What is the writer's main point about renewable energy pricing?

- The decrease in renewable energy pricing can benefit consumers.
- Electric cooperatives plan to increase energy pricing.
- Coal capacity is being increased to meet rising consumer demand.
- The prices for new wind and solar projects are higher than the operating costs of existing coal assets.

## **Q2. Multiple choices (choose multiple answers)**

Candidates will see a textual passage of around 200 to 300 words.

Candidates will also see a question with 5 to 7 choices and must select the right choice.

## Question a

Water covers more than 66% of the earth's surface. Nearly all of Earth's water is found in seas and other saltwater bodies, while most of the remaining freshwater is solidified in the form of snow cover. Waterways, lakes, wetlands, and aquifers that contain easily accessible freshwater represent less than 1% of the world's water supply. But this valuable resource supports an enormous diversity of life and is vital for human survival.

The demand for water for various uses, such as drinking, sanitation, farming, and energy production, continues to increase as the worldwide population grows. In the meantime, human activities and environmental change influence water cycle changes, putting freshwater ecosystems under strain. Pollution, construction, and mining activities pose additional challenges.

Which of the following are true statements about water?

- Human survival does not depend on water.
- Over two-thirds of the surface of the earth is covered with water.
- Freshwater constitutes about 1% of the world's water supply.
- The demand for water has seen a steady decline over time.
- Most of the Earth's water is solidified in the form of snow.

## Question b

A new report from WHO suggests that excessive or inappropriate speed contributes to 1 in 3 road traffic fatalities worldwide. Measures to address speed prevent road traffic deaths and injuries, make populations healthier, and make cities more sustainable.

Around 1.25 million people die every year on the world's roads. Studies indicate that 40–50% of drivers exceed posted speed limits. Drivers who are male, young, and under the influence of alcohol are more likely to be involved in speed-related crashes. Road traffic crashes remain the number one cause of death among young people aged 15–29. They are estimated to cost countries 3–5% of GDP and push many families into poverty.

Yet only 47 countries of the world follow good practice on one of the main speed management measures, namely implementing an urban speed limit of 50 km/h or less and allowing local authorities to reduce these limits further on roads around schools, residences, and businesses.

Speed is at the core of the global road traffic injury problem," notes WHO Director-General Dr Margaret Chan. "If countries were to address this key risk, they would soon reap the rewards of safer roads, both in terms of lives saved and increases in walking and cycling, with profound and lasting effects on health.

Which of the following are true according to the passage?

- Every country in the world follows the good practice of speed management policies.
- Most traffic accidents can be reduced by regulating the speed of vehicles.
- In addition to the loss of life, traffic accidents affect the entire economy.
- Road accidents are not linked to the consumption of alcoholic beverages.
- Walking and cycling increase the probability of traffic accidents

## Question c

Various types of grasses have adapted to different soils & altitudes & grow in company with a variety of plants.

In colorful sequence, the grasses create a three-dimensional mosaic that begins on the edges of the shrub desert, covering the foothills and running up through the woodlands out onto mountaintop meadows. You can see these differences quite easily. Many of the park's finest grasses may be found in the mountains, for while the grasslands blend into the woodlands somewhere around 1,700 meters, the grasses continue all the way up to the mountaintops. Again, the species change with climate, altitude, and ground cover conditions. The golden thread-leaf Stipa grass likes to grow under juniper trees, spilling its long blades in rounded clumps. So does The beautiful Bull muhly grass that favors north-facing slopes and grows in clumps up to just over a meter high; it helps hold soil on the hillsides. Its large purple flowering heads make good bedding grass for deer.

Which of the following statements are supported by the passage?

- The golden thread-leaf Stipa grass makes a good bedding material for deer..
- Most of the park's best grasses can be discovered at high altitudes.
- The beautiful Bull muhly grass grows on the east-facing slopes.
- Different grass species thrive in different environments.
- The grasses are rarely found growing in the woodlands.

## Question d

The end of the Second World War saw Japan grappling with food shortages, and long queues of hungry people braving the cold for food became a common sight. One of the main staples of the Japanese diet, noodles, was in short supply, and the nation's noodle manufacturers could not meet the country's needs. At this point, Taiwanese inventor and entrepreneur Momofuku Ando recognized the opportunity and decided to take matters into his own hands.

Ando set out to develop the noodles production himself and dedicated months to perfecting his flash-frying method. He aimed to create a product that was not only delicious but also affordable and easy to make. After several rounds of trial and error testing, Ando finally launched the first box of pre-cooked instant noodles in 1958, revolutionizing the food industry.

The success of Ando's instant noodles paved the way for his next innovation - the cup of noodles. In just a few years, he invented a cup of noodles that could be consumed simply by removing the top, pouring hot water, and waiting. This new product was convenient and became a hit among consumers who were always on the go.

Ando's inventions not only helped solve Japan's food crisis but also transformed how people consume noodles worldwide. Today, instant noodles are a staple food in many households and are enjoyed by millions globally. Momofuku Ando's legacy lives on, and his innovations inspire new generations of food entrepreneurs.

Which of the following statements about noodles match the information in the passage?

- Ando wanted to position them as a luxury item.
- Instant noodles took months to cook.
- Cup noodles are extremely easy to make.
- Japan's production of noodles outstripped public demand.
- Ando sold the first box of pre-cooked instant noodles in 1958.

## Question e

COVID-19 spreads mainly among people in close contact for a prolonged period. Spread happens when an infected person coughs, sneezes, or talks, and droplets from their mouth or nose are launched into the air and land in the mouths or noses of people nearby. Social distancing helps limit contact with infected people and contaminated surfaces.

Citizens need to follow guidance from the local authorities. If they need to shop for food or medicine at the grocery store or pharmacy, they must stay at least 6 feet away from others. Online delivery services for medications and groceries should be given preference as much as possible.

Covering their mouth and nose with a cloth face cover when around others is essential, and people must stay at least 6 feet from others, even when they wear a face covering. Everyone has a role in slowing the spread and protecting themselves, their family, and their community.

Which of these claims are true according to the passage?

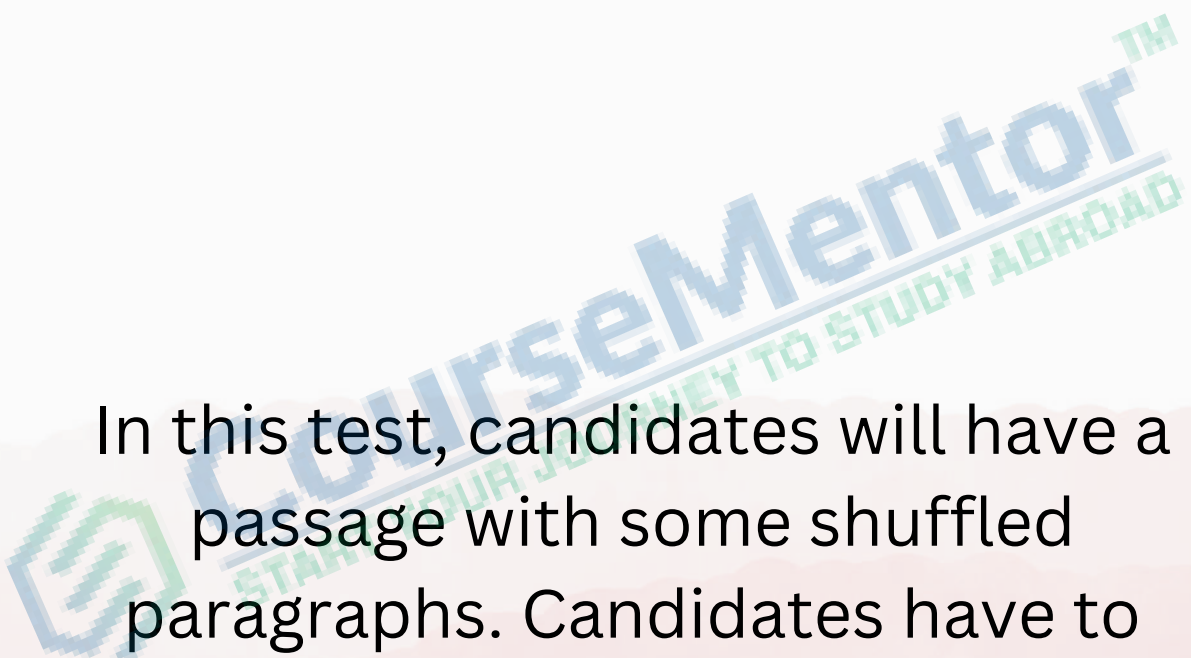

- Medicines and food products should invariably be purchased at stores.
- It is not clear how COVID-19 disease spreads.
- It is important to follow the instructions provided by the authorities.
- When people wear face masks, they do not need to maintain a distance of 6 feet from others.
- Social distancing reduces exposure to individuals who are sick.

**COURSE MENTOR**  
START YOUR JOURNEY HERE

### Q3. Re-order Paragraphs

In this test, candidates will have a passage with some shuffled paragraphs. Candidates have to correct them.

## Question a

1. But we cannot deny the advantages of technology, for example, phones have brought the world closer.
2. Technology has both advantages and disadvantages.
3. For example, phones are known to cause problems due to radiation.
4. I think it all boils down to how we use a particular technology.
5. Some people also make phone calls while driving, which causes incidents.

## Question b

1. To face the growth of trade, it was deemed necessary to remedy this lack of adequate currency.
2. In most countries, it is only the government, through their central banks, who are permitted to issue currency.
3. The first Scottish bank to do this was the Bank of Scotland.
4. But in Scotland, three banks are still allowed to issue banknotes.
5. When this bank was founded in 1695, Scots coinage was in short supply and of uncertain value, compared with English, Dutch, Flemish, or French coin.

### Question c

1. This usually irritates me, but I don't mind it here, and their interactions are well-handled and informative.
2. They're not all necessarily good guys, either, although with the hurricanes wreaking wholesale destruction upon the world's coastal areas, ethical categories tend to become irrelevant.
3. But even the Evil American Corporate Magnate is a pretty likable guy.
4. Unlike Barnes' previous books, *Mother of Storms* has a fairly large cast of viewpoint characters.

### Question d

1. The date of his baptism is unknown.
2. Stephen I, also known as King Saint Stephen, was the last Grand Prince of the Hungarians between 997 and 1000 or 1001, and the first King of Hungary from 1000 or 1001 until his death in 1038.
3. At his birth, he was given the pagan name Vajk.
4. The year of his birth is uncertain, but many details of his life suggest that he was born in or after 975 in Esztergom.
5. He was the only son of Grand Prince Géza and his wife, Sarolt, who was descended from the prominent family of the Gyulas.

## Question e

1. The consequence is that refugee acceptance is slowing down.
2. Australian immigration policy was relatively loose before.
3. We accept more refugees than we were expected.
4. At the same time, new refugee policies have been changed secretly.
5. Because of the election, refugee applications are extended.

## Q4. Reading: fill in the Blanks

Candidates will see 4 or 5 passages of around 80 words, with 3 to 5 blanks and 6 to 8 choices. You need to drag and drop the answers in space.

## Question a

The problem caused by plastic pollution is getting out of hand, but public\_\_\_and intervention is about to change that. About 9 billion kilograms of plastic waste reaches the world's oceans from coastal areas annually.

This plastic causes\_\_\_and harm to marine creatures such as turtles, whales, and seabirds that starve because their bellies are full of plastic particles leaving no room for real food. A\_\_\_\_\_ study about the potential adverse impacts of tiny pieces of plastic in the marine food chain says that it might adversely\_\_\_human health and food security.

recent, stress, affect, awareness

## Question b

Hyperglue is one of the most\_\_\_instant adhesives available in the market. This popularity is primarily due to its ability to glue\_\_\_together quickly.

Hobbyists, students, and even professionals prefer to use it in their projects to\_\_\_time. However, Hyperglue has an\_\_\_\_\_short shelf life, as its primary ingredient, cyanoacrylate dries up easily.

extremely, save, popular, objects

## Question c

Participation in higher education is more important today than ever before. \_\_\_\_ change, digitization and innovation have a high priority for advanced skills as less skilled \_\_\_\_ are driven out of the market. Those who have only completed upper secondary education will earn far less than a university graduate, perpetuating this vicious cycle over the future \_\_\_\_\_. It takes four to five generations for the children of families in the lower \_\_\_\_ bracket to reach the average earnings level in many countries. Disadvantages in education and the labor market lead to differences in socioeconomic \_\_\_\_\_ and overall well-being, which are then passed on from parents to their children.

jobs, income, technological, generations, outcomes

## Question d

In all countries, economists hold leading\_\_\_\_\_in society, are managers of the largest companies and banks, and heads of governments, central bank governors, and managers of renowned\_\_\_\_\_firms and analytics departments. This makes Economics one of the elite programs at the most renowned universities, where only a few percent of the best students are accepted. Economics is a challenging study that requires an ambitious and\_\_\_\_\_person with good\_\_\_\_\_skills. A person who, as many examples show, can make decisions in a key position in the economy and in government policy. Why? Graduates of the Master's programme in Economics are in a position to solve economic and entrepreneurial problems that other people usually do not recognise or consider to be important. If you are ambitious, unafraid of hard work, and eager to make important social decisions in your life, then enrolling in the Economics program will help you achieve your\_\_\_\_\_.

motivated, goals, positions, analytical, consulting

## Question e

Each cell in your body needs oxygen to live. The air that we breathe contains oxygen and gases. Once in the lungs, oxygen is\_\_\_\_to the bloodstream and carried through your body. Oxygen is exchanged for waste gas called carbon dioxide at each cell in your body. Your bloodstream then brings this gas back to the lungs, where it is\_\_\_\_from the bloodstream and then exhaled. Your lungs and respiratory system\_\_\_\_perform this vital process called gas exchange. The capacity of the lungs decreases as you age. Keep your lungs healthy every day. Eat a balanced diet, exercise, and reduce\_\_\_\_\_.

stress, automatically, removed, transferred

## Q5. Reading & writing: fill in the blanks

In this, candidates will see a passage of around 300 words; there will be some blanks. When you take your mouse cursor to a blank, you will see four options and must select the most suitable option.

## Question a

While it's no wonder that dogs are space1 as man's best friends, little is known about the origins of this friendship. It is presumed that dogs were one of the first animals to be space2 by humans. One notable effect of this long relationship with humans is that, unlike other canine species, dogs can space3 on a carbohydrate-rich diet. Historically, dogs have been helping us in many ways, but recently they are also assisting people with disabilities and space4 in therapy. Patients who were administered dog therapy demonstrated decreased stress, increased happiness, and space5 energy levels.

Space 1 options	Space 2 options	Space 3 options	Space 4 options	Space 5 options
pretense popularp oster pounce	deters donatedd omestica ted delegate	felony fasten finding flourish	appeal announce aloud aiding	improved idly ignore iluminates

## Question b

Despite progress over the last two\_\_space1\_\_, still more than 35 percent of the urban population of the less developed regions was living in slums in 2005-2007. In the least developed countries, 71 percent of the urban dwellers lived in slums. This proportion is very high in sub-Saharan Africa,\_\_space2\_\_from 61 percent in Western Africa to 71 percent in Middle Africa. It is also very high in Sudan, where 94 percent of the urban dwellers live in slums. In Asia, this proportion is 33 percent, close to the average of the less developed\_\_space3\_\_, and 22 percentage points lower than in Africa. Twenty-five percent of the urban population of Western Asia lives in slums, a percentage significantly lower than the world average. Lack of access to safe drinking water and adequate sanitation are typical characteristics of urban slums. Access to safe water and adequate sanitation are among the indicators used to monitor progress toward\_\_space4\_\_sustainability. Globally, 134 million urban dwellers (4 percent) lacked\_\_space5\_\_to an improved water supply in 2008, and 806 million (24 percent) lacked adequate sanitation services. Most of these people lived in informal, overcrowded urban settlements in developing countries, particularly in Africa and Asia.

## Question c

In the second century of the Christian era, the empire of Rome comprehended the fairest part of the earth and the most civilized space1 of mankind. The frontiers of that extensive monarchy were guarded by ancient renown and disciplined valor. The gentle but powerful space2 of laws and manners had gradually cemented the union of the provinces. Their peaceful inhabitants enjoyed and abused the advantages of wealth and luxury. The image of a free constitution was preserved with decent reverence: the Roman senate appeared to possess the sovereign space3 and devolved on the emperors all the executive powers of government. During a happy period of more than four score years, the public space4 was conducted by the virtue and abilities of Nerva, Trajan, Hadrian, and the two Antonines.

- A) It's a great opportunity to make new friends.
- B) It can be challenging but worth it.
- C) It's only for wealthy students.
- D) It's not a good idea.

### Question d

What is the speaker's purpose in this recording?

- A) to provide information about a new product
- B) to advertise a sale
- C) to offer a special promotion
- D) to introduce a new service

### Question e

What is the speaker's advice for people who want to improve their public speaking skills?

- A) Speak quickly to keep the audience's attention.
- B) Memorize your entire speech beforehand.
- C) Practice speaking in front of a mirror.
- D) Be yourself and speak naturally.

## **Q4. Highlight the correct summary**

Candidates will hear a lecture of around 30 to 90 seconds and then have to choose the correct answer from 3 to 5 options.

## Question a

1. Countries may be admitted as operators when a simple majority vote of the World Telecom Union has approved their application. Territories not responsible for the conduct of their international relations may be admitted as Associate Members upon application made by the Member or other authority responsible for their communications. Members of WTU are grouped according to their technical infrastructure.
2. A simple majority of the World Health Assembly is required for countries to be accepted as members. All countries that are members of the United Nations can become members of the W.H.O. by adopting its constitution. Regional distribution is the criterion for the grouping of W.H.O. members.
3. All countries that are United Nations members cannot become members of WHO. Other countries are rarely admitted as members even when a vote of the World Health Assembly has approved their application. Members of the WHO are grouped according to their GDP.
4. Nations that are United Nations members may move toward becoming participants in WHO by disobeying its Constitution. Territories not responsible for the conduct of their international relations may be admitted as Associate Members upon application made by their lawyers. Members of the WHO are controlled according to the whims of the judges.

## Question b

1. For many years several European collections of Egyptian antiquities have contained a certain series of objects that gave archaeologists great difficulty. It was recognised that these artifacts had been discovered in Egypt, but it was impossible to assign them a place in the known periods of Egyptian art.
2. There were vases of a familiar shape and color, greenish slate plates, many of them in familiar animal shapes, and other similar items. Some slate plates with hunting and battle scenes and other relief representations made it easy in style many researchers considered products of Ancient Egypt's art.
3. A few European collections of Egyptian antiques contained several objects that brought great convenience to archaeologists. It was known positively that these objects were found in Egypt, so it was easy to assign them a place in the known periods of Egyptian art.
4. Several European collections of Egyptian antiquities have contained a certain series of objects that gave archaeologists great convenience. There were vases of a familiar shape and color, greenish slate plates, many of them in familiar animal shapes, and other similar things.

## Question c

1. Mother's Day is when many people worldwide appreciate the contribution of mothers. According to ancient Greek tradition, Rhea, the Mother of Gods, was venerated at the early Mother's Day celebrations. Julia Ward Howe and Anna Jarvis are credited with popularising this day in modern society. However, many people believe that Mother's Day is now highly commercialized.
2. Mother's Day was invented by greeting card companies. However, florists, jewelers, gift shops, restaurants, hotels, and retail stores decided not to promote this day by declining to provide special offers and discounts for this occasion. Mothers are expected to work harder in the kitchen and prepare food on this day.
3. Mother's Day is a Chinese festival in which many people in China honor their mothers. It is held exactly three weeks before the Chinese New Year. According to ancient Chinese tradition, early Mother's Day celebrations can be dated to the festivities in honor of Mei Ling, Mother of the Gods. Mother's Day is an annual public holiday exclusively celebrated in China.
4. According to ancient Roman tradition, early Mother's Day celebrations can be dated to the festivities in honor of Venus, Mother of Cupid. The modern roots of Mother's Day can be traced back to two little boys – Neil and Raymond, who were significant for establishing this tradition in Italy. They wished to pay tribute to their teachers each year and urged others to honor their educators.

## Question d

1. People can create health problems for rodents and other pests. When rodents eat or drink food or water that might have come into contact with humans, they may get sick. Proximity to humans can trigger asthma attacks or allergic reactions in some rats.
2. Plants spread across 35 diseases worldwide. Diseases borne by plants can also be transmitted to rodents. Herbicides can control these unwanted plants so they are no longer dangerous to rodents.
3. Rats and mice have been unfairly blamed for the spread of many diseases. These diseases are not directly transmitted to humans through rodent handling or bites. Rodent control is an unnecessary activity that is commonly practiced around the world
4. Rats and other pests may cause problems for your health. They can transmit diseases and attack humans or domestic animals. Preventing human exposure to rodent diseases can be accomplished by covering all openings in the walls and trapping any existing rodents.

## Question e

1. Diabetes is caused by a diet in which one or more nutrients are insufficient. Major causes of diabetes include poverty and high food prices. Specially formulated foods appear to be effective as a treatment for diabetes. The symptoms of diabetes were reportedly known to the ancient Egyptians.
2. Diabetes is a disease that involves problems with the body's ability to process sodium. It is characterized by elevated sodium levels in the blood, which leads to serious damage to the heart and blood vessels over time. It can be prevented or delayed by decreasing salt intake, reducing alcohol intake, and having a stress-free lifestyle.
3. Diabetes is a medical condition that adversely affects the body's ability to process blood glucose. This is because the body does not use insulin properly and will not be able to maintain normal blood sugar levels. There is no cure for diabetes, but losing weight, consuming nutritious food, and leading an active life will help.
4. Consumption of soft drinks can benefit people with diabetes. When people consume sugary drinks, they need to increase them by more than 20% of their energy needs for additional health benefits. When your insulin level increases, it triggers the release of blood sugar in your body.

## **Q5. Multiple choice: choose various answers**

Candidates will hear a lecture of around 60 seconds to 90 seconds. And then have to choose the correct option from the given choices.

### Question a

Which of the following animals are mentioned in the recording?

- A) giraffes
- B) lions
- C) zebras
- D) elephants

### Question b

Which of the following tasks does the speaker mention in the recording?

- A) sending an email
- B) scheduling a meeting
- C) booking a hotel
- D) making a phone call

### Question c

- D) consider

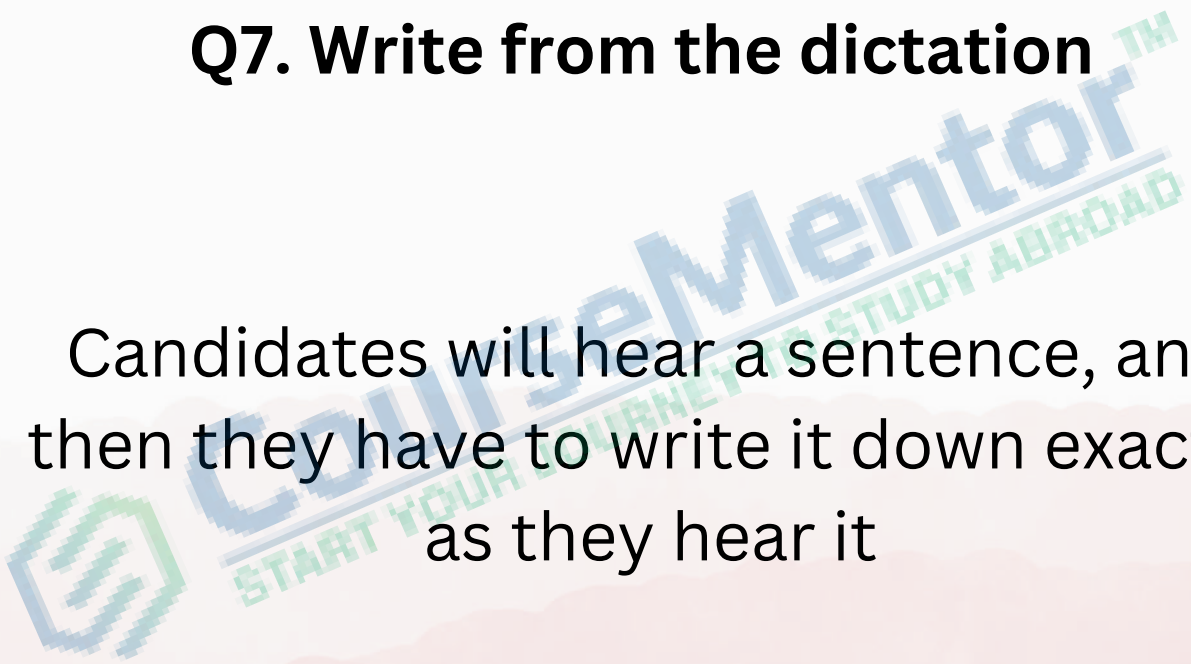

### Question e

The \_\_\_ has increased significantly since we started advertising on social media.

- A) sales
- B) profits
- C) expenses
- D) losses

## Q7. Write from the dictation

Candidates will hear a sentence, and then they have to write it down exactly as they hear it

**Question a**

**Question b**

**Question c**

**Question d**

**Question e**

## **Q8. Highlight incorrect words**

Candidates will hear an audio clip of 15 seconds to 50 seconds, then they will see a textual passage and have to highlight wrongly pronounced words.

### **Question a**

Australia is home to some of the most dangerous creatures in the world. The Australian funnel-web spider, for example, is responsible for most of the country's spider bites. It is found in New South Wales, Queensland, and Victoria, and is most active during the summer months. Symptoms of a bite can include nausea, sweating, and an increased heart rate. If a funnel-web spider bites you, seek medical attention immediately.

### **Question b**

The first Olympic Games were held in Athens, Greece, in 1896. The games were originally intended to be a celebration of amateur sports, and only male athletes were allowed to compete. The first modern Olympic Games featured just nine sports, including athletics, swimming, and fencing. The event was a huge success, with athletes from 14 countries taking part.

### **Question c**

The Great Wall of China is a series of fortifications built along the northern borders of China during various imperial dynasties. The wall stretches over 13,000 miles and is considered one of the greatest engineering feats in human history. The wall was built using a variety of materials, including brick, tamped earth, and stone. It served as a defensive barrier against invading forces.

### Question d

The Mona Lisa is a portrait painting by the Italian artist Leonardo da Vinci. It is a half-length portrait of a seated woman, believed to be Lisa Gherardini, the wife of Francesco del Giocondo. The painting is famous for its enigmatic smile and has been the subject of many debates regarding its meaning and origin. The Mona Lisa is currently displayed at the Louvre Museum in Paris, France.

### Question e

The Internet is a global network of computers that communicate with each other using standard protocols. It was first developed in the 1960s by the United States Department of Defense to facilitate communication between research institutions. Today, the Internet has become an essential tool for communication, commerce, and entertainment, with billions of users around the world.

## Q1. PTE Summarizes Written Text

### **Answer a**

The demand for electric vehicles has risen due to environmental concerns and improvements in battery technology, with lower operating costs and emissions among the advantages, but limited charging infrastructure and higher upfront costs remain obstacles to widespread adoption.

### **Answer b**

Social responsibility in business has gained attention recently, with socially responsible companies aiming to have a positive impact on society and the environment through measures such as reducing waste and emissions, promoting diversity and inclusion, and supporting community development initiatives.

### **Answer c**

The use of renewable energy sources like solar and wind power has grown due to technological advancements and government incentives, offering benefits such as reduced greenhouse gas emissions and increased energy security, but challenges like intermittency and the need for energy storage solutions remain.

### **Answer d**

Artificial intelligence has transformative potential for industries like healthcare and finance, as AI systems can analyze data and identify patterns for more accurate predictions and decision-making, but ethical concerns surrounding areas such as employment and privacy have arisen.

### **Answer e**

The retail industry has been fundamentally changed by the rise of e-commerce, with online shopping's convenience and ability to offer a wide range of products at competitive prices leading to a significant impact on brick-and-mortar stores struggling to compete with their online counterparts.

## Q2. Write Essays

## **Answer a**

Education is a crucial component of preparing young people for the future. While some believe that students should only study academic subjects, others argue that they should also learn practical skills. Those in favor of an academic-only approach believe that a strong foundation in core subjects such as mathematics, science, and language is essential for success in higher education and future careers. On the other hand, proponents of practical skills argue that students need to learn skills like cooking, budgeting, and basic car maintenance to navigate everyday life. I believe that both academic and practical skills are important for a well-rounded education. While a strong academic foundation is necessary for success in higher education and specialized careers, practical skills are essential for everyday life & should not be neglected.

## **Answer b**

Social media has become an integral part of modern life, with people spending significant amounts of time on platforms like Facebook, Twitter, and Instagram. Some argue that social media has a positive influence on society, as it allows people to connect with others and share information and ideas. It also has the potential to facilitate social and political change. However, others believe that social media has a negative impact, as it can be a source of misinformation, cyberbullying, and addiction. It can also perpetuate harmful societal norms and contribute to social isolation. In my opinion, social media can have both positive and negative effects, depending on how it is used. While it can facilitate important conversations and connect people from around the world, it is important to be mindful of its potential downsides and to use it responsibly.

## Answer c

Learning a foreign language has become increasingly important in a globalized world. Some argue that children should start learning a foreign language from a young age, as they are more receptive to language learning and can develop fluency more easily. Others argue that introducing a foreign language too early can overwhelm young children and lead to a lack of interest or motivation later on.

Instead, they advocate for introducing foreign language learning in later stages of education, when students have a stronger foundation in their native language and are better equipped to grasp the complexities of a new language. In my opinion, there are benefits to both approaches. While starting language learning at a young age can lead to fluency and provide an advantage in future academic and career pursuits, it is also important to consider the potential challenges and drawbacks of early language learning. Ultimately, the decision of when to introduce foreign language learning should depend on the individual student and their learning style and preferences.

### **Answer d**

Technology has transformed the way we communicate and connect with others. Some argue that it has made us more isolated, as we spend increasing amounts of time on screens and less time interacting face-to-face. They also point to the rise of online trolling and cyberbullying as evidence of technology's negative impact on social connections. However, others argue that technology has brought people closer together, allowing us to connect with others from around the world and share information and ideas on a global scale. It has also facilitated important social and political movements.

### **Answer e**

Young people's increasing involvement in politics in many countries can be attributed to several reasons.

Firstly, access to information and technology has empowered young individuals to stay informed about political issues and engage in discussions through social media platforms and online communities. They can easily access news, share their views, and mobilize support for causes they believe in. Secondly, young people often have a strong desire for change and a sense of social justice. They are passionate about addressing pressing issues such as climate change, inequality, and social justice, and see political engagement as a means to bring about the necessary reforms.

Additionally, youth-led movements and activist groups have played a significant role in encouraging political participation among young individuals.

**Q2. Multiple choices (choose multiple answers)**

### **Answer a**

- Over two-thirds of the surface of the earth is covered with water
- Freshwater constitutes about 1% of the world's water supply

### **Answer b**

- In addition to the loss of life, traffic accidents affect the entire economy
- Most traffic accidents can be reduced by regulating the speed of vehicles.

### **Answer c**

- Different grass species thrive in different environments.
- Most of the park's best grasses can be discovered at high altitudes.

### **Answer d**

- Ando sold the first box of pre-cooked instant noodles in 1958.
- Cup noodles are extremely easy to make.

### **Answer e**

- It is important to follow the instructions provided by the authorities.
- Social distancing reduces exposure to individuals who are sick.

### Q3. Re-order Paragraphs

## **Answer a**

Technology has both advantages and disadvantages. But we cannot deny the advantages of technology, for example, phones have brought the world closer. I think it all boils down to how we use a particular technology. For example, phones are known to cause problems due to radiation. Some people also make phone calls while driving, which causes incidents.

## **Answer b**

When this bank was founded in 1695, Scots coinage was in short supply and of uncertain value, compared with English, Dutch, Flemish, or French coin. To face the growth of trade, it was deemed necessary to remedy this lack of adequate currency. The first Scottish bank to do this was the Bank of Scotland. In most countries, it is only the government, through their central banks, who are permitted to issue currency. But in Scotland, three banks are still allowed to issue banknotes.

### **Answer c**

Unlike Barnes' previous books, *Mother of Storms* has a fairly large cast of viewpoint characters. But even the Evil American Corporate Magnate is a pretty likable guy. This usually irritates me, but I don't mind it here, and their interactions are well-handled and informative. They're not all necessarily good guys, either, although with the hurricanes wreaking wholesale destruction upon the world's coastal areas, ethical categories tend to become irrelevant.

### **Answer d**

The date of his baptism is unknown. Stephen I, also known as King Saint Stephen, was the last Grand Prince of the Hungarians between 997 and 1000 or 1001, and the first King of Hungary from 1000 or 1001 until his death in 1038. At his birth, he was given the pagan name Vajk. The year of his birth is uncertain, but many details of his life suggest that he was born in or after 975 in Esztergom. He was the only son of Grand Prince Géza and his wife, Sarolt, who was descended from the prominent family of the Gyulas.

### **Answer e**

Australian immigration policy was relatively loose before. Because of the election, refugee applications are extended. We accept more refugees than we were expected. At the same time, new refugee policies have been changed secretly. The consequence is that refugee acceptance is slowing down.
